Languages' knowledge:

- French : mother language
- English : current life

Professional expériences :

- **January 2017 -> Current: Lead developer at Plan.net.**

Application development with Symfony.

- **July 2011-> Current: Freelance timekeeper**

Creation of the website "easychrono.be" with CMS Made By Simple.
The website provides registration and results for triathlon, duathlon, jogging …
It also provides online live results with an interaction between Java and Node.js/PHP.
I developed a program in Java to communicate with 'TCDE – Elite Decoder".

- **April 2010 -> Current: Additional independent as Analyst Programmer**

I provide mainly consultancy, analysis and application's development
I'm in charge to manage a server who does backups for auctions house.
Development with CMS Made By Simple for auctions house (ferraton.be, venteslegros.com).

- **February 2016 -> November 2016: Backend developer at MySocialBook**

Application development with Symfony.

- **February 2015 -> January 2016: Lead developer at Touch Agency Belgium**

- **December 2013 -> January 2015: Web and Mobile developer at Fingerapps**

Application development for multi-user, multi-access and multi-database with Symfony2. Application development with CMSMS.
IOS development (adding part in an existing project).

- **September 2011 -> November 2011: PHP developer at Globule Bleu.**

I worked on the creation of website for estate agency. To do that, I used technologies like PHP, HTML, CSS, AJAX, MYSQL and CMS like Drupal.

- **February 2011 -> April 2011: IT Consultant at Systems Solutions**

I was on mission at DNAVision.
My work was the creation of a PHP module (NGS_BIO_INFO) whit Smarty into an existent application (SMS). I also developed with the Framework Django an application to download files.

- **August 15th 2009 -> January 31st 2011 : Analyst Programmer at Teamwork**

I worked on a migration server, an update of a python application (Auction In Europe and his derivatives) and development with PHP (from scratch or with framework like CakePHP or with CMS like TYPO3).

- **January 1st 2009 -> May 29th 2009 : Analyst programmer**

In my end of studies exercise for my Degree, I developed, for a triathlon team, a web service to manage registration for triathlon. To do that, I used technologies like AJAX, PHP, JAVASCRIPT, XSLT, XML … Development in model view controller and using of template's generator like smarty. I also used design patterns and object libraries that I created or extended like (PDO, SOAP ...). I used as databases MySql with triggers and procedures.

- **May 19th 2008 -> July 18th 2008 : PHP Web developer at DS Improve.**

I worked on the creation of websites for estate agency. To do that, I used technologies like PHP, HTML, CSS, AJAX, MYSQL and CMS like TYPO3 or JOOMLA.

- **April 1st -> May 25th 2007 : Web developer at Maxipress.**

I worked on the creation of web pages with connections to databases, using languages such as ASP, HTML, PHP, CSS, JAVASCRIPT, MYSQL. I worked on windows and Linux platforms.

- **August 2006 : Student job at Belgacom.**

The work was activation of broadband subscriptions, errors management, data quality checking.

Personal experiences:

- I develop with PHP/MySql since 2004. I follow the language evolution and now, I developed mainly in PHP 5. I have also updated a static site in dynamic site (http://oxygenetriathlon.be).
